Winter is coming! That means that the compost pickup program will be winding down for the season. The last pick up for 2018 is the first Monday of November; the 5th.

As a reminder please trim your elm trees now. Elm trees are a weed and need to be controlled. If you have trees, including elm trees, that are growing into the back alley please trim them back. Elm trees can be trimmed throughout the winter with the last day being March 31st 2019. Loraas is accepting elm trees now.
